

HOOP-Jam “Switch-on” for Crowdstrike Falcon Logscale Fast-track

Introducing the HOOP-Jam “Switch-on” for Crowdstrike Falcon Logscale service package.

What can you expect?

This service package is designed for customers new to Logscale and provides a wide range of offerings to accommodate from Deployment and Architecture, and all offerings include HOOP’s expert continuous support subscription.

Experience next generation data analytics with Crowdstrike’s Falcon Logscale platform, which provides a modern architecture with high data ingestion speeds, robust search capabilities, and speed and scalability capabilities that surpass 1 petabytes, while maintaining lowest in-class TCO.

This service starts with a kick-off workshop and a full day of enablement (often split into 2 half days due to the amount of content). It is then complimented with ongoing support through the year, in the form of regular (mostly quarterly) check-in workshops and ad-hoc support as needed.

Cost-effective platform management

Our aim is to keep the costs to a minimum, and to enable your teams to become highly competent in running the platform.

This service is suitable for any new SaaS or FLTR customers looking to jumpstart their cyber security data journey with Falcon Logscale.

Key Benefits

Get up and running with Crowdstrike Falcon Logscale in 1 day.

Get expert continuous support from HOOP Cyber.

Enable your security teams on what’s new with FLTR and Logscale.

Get dashboards on Logscale.

Learn the Logscale query language (LQL).

Get support for investigations (querying) with LQL.

Get assistance and advice on future adoption requirements.

Get support with use case development.
